

# LYRICS

# NATURAL PUNISHMENT

Destroying all the living, their souls will fade away  
They call it all democracy, humanity of today  
People and religion who say you will survive  
Idiotism – it's all a fucking lie!

They think they own the world and that's the human fate  
Destroying it all, as we have to create  
The nature will take revenge, it will be judgement day  
Natural punishment, you can't run away

No!!!  
You can't run away  
Try to run away...  
You can't run away

Financial depression, pollution of your mind  
Forbidden existence - suffering mankind  
The temperature will rise and the earth will boil away  
Burning up, bleaching out - is this the price to pay?

Your mother is dying - she can't stay alive  
Forgotten existence - suffering mankind  
Creation of death - is that a human life?  
Inhuman condition - why?  
Innocent victim - reality you can't see

No!!!  
You can't see  
You will never see...  
You can't see

Pollution of your mind and soul  
Reality that you don't know  
End of life will be in pain  
Human life got insane

Change your life or you'll be dead  
You will breath your last breath  
Can't you see it with your eyes?  
Our lost souls have to rise

Ignorant people who say you will survive  
Idiotism - it's all a fucking lie

# IN SEARCH FOR TRUTH WE WILL STAGNATE

What if the world was gone in silent darkness?  
History goes on but moving nowhere  
Just standing still and waits forever  
It's taking form into another shape beyond recognition  
And time goes on - still moving nowhere  
Life is frozen in stagnation of empty words that

You have been telling me all my damn life  
The reason I live and the reason I die  
A fake way of passion with so many lies  
'Cause I just believe what I see in the light with my eyes

Stalemate!  
In the search for truth we will stagnate!  
"God is leading you" - no rhyme or reason  
They mislead you too with their fake passion and empty words...

Lies! - It's a lie - They told you lies - Just fucking lies

You have been telling me all my damn life  
The reason I live and the reason I die  
A fake way of passion with so many lies  
'Cause I just believe what I see in the light

What if the world was gone in silent darkness?  
History goes on but moving nowhere  
Just standing still and waits forever  
It's taking form into another shape beyond recognition  
And time goes on - still moving nowhere  
Life is frozen in stagnation of empty words...

Lies! - It's a lie - They told you lies  
It's a lie they told you!

# EMOTIONAL DARKNESS

When life betrays you on your each step  
You get so tired - tired to the death!

Hiding your fear in your subconscious  
Your soul is surrounded by a hundred shades of grey  
Living a painful life that seem so endlessly  
Not just a nightmare - but reality

Everything around you is void  
Without movement - without perspectives  
Empty mind and thoughts without a point  
Recollect your memories from the past

Emotional darkness - the shadows of your life  
Created the fear in your sensitive mind  
Your pleasure to live is smashed in agony  
The sorrow within made by your insanity

But now I see what you want from me  
A piece of life - to feel alive inside  
To feel released from agony  
To kill the pain by killing me

But you will not succeed, killing me  
You will die as you try – the strong will survive

Everything around you is void  
Without movement - without perspectives  
Empty mind and thoughts without a point  
Recollect your memories from the past

Emotional darkness - the shadows of your life  
Created the fear in your sensitive mind  
Your pleasure to live is smashed in agony  
The sorrow within made by your insanity

# YOU JUST FUCKING HATE YOURSELF

Hate is what I feel all the time when I look  
At the world right now  
Hate is what I get all the time as you try  
To justify your will to hate

If you fucking hate yourself  
Go ahead and kill yourself  
I don't give a fucking shit  
Just leave me alone

You just fucking hate yourself...

War is just another result as you try  
To maintain control  
War - a pathetic reason as you try  
To justify your will to hate

If you fucking hate yourself  
Go ahead and kill yourself  
I don't give a fucking shit  
Just leave me alone

You just fucking hate yourself...

Hate is what I feel all the time when I look  
At the world right now  
Hate is all I get at the time as you try  
To justify your will to hate

If you fucking hate yourself  
Go ahead and kill yourself  
I don't give a fucking shit  
Just leave me alone

# IN TOUCH WITH TOMORROW

There are corners in our existence  
That we cannot quite see  
There are corners in our existence  
We will never ever understand

You can leave this world of failure  
Leaving some kind of mark  
You will leave this world forever  
Leaving it all behind  
You can close your eyes and wonder  
Heaven? Or hell? Or what?  
You get in touch with tomorrow  
A ghost in our memory

Is your passing away an eternal blackout?  
Is death just the end of it all?

You can leave this world of failure  
Leaving some kind of mark  
You will leave this world forever  
Leaving it all behind  
You can close your eyes and wonder  
Heaven? Or hell? Or what?  
You get in touch with tomorrow  
A ghost in our memory

All those questions are answered  
The moment you pass away  
Now those questions are useless  
Once you enter your grave

You can leave this world of failure  
Leaving some kind of mark  
You will leave this world forever  
Leaving it all behind  
You can close your eyes and wonder  
Heaven? Or hell? Or what?  
You get in touch with tomorrow  
A ghost in our memory

In touch with tomorrow...
